

STEMXplore Website with EdyuLynk

To start local server

Backend:

```
/Edyu-Lynk/backend  
uvicorn server:app --port 8001 --reload
```

Frontend

```
/   
npm run dev
```

When live change env variables to adjust for production changes.

Verify stemxplore.ca domain on Resend and send emails via the stemxplore email. (Or just use SMTP)

Try to import all the data from emergent Mongo DB

Connect contact us form with Whatsapp API or Resend or SMTP.
